

#syntax.workshop {}

Lets get started with some of the foundational practices of HTML & CSS and add them to your skillset.

Day 1 - Website Overview:

1. Setting up the local environment: looking at software
2. How a website works: From Request to Display
3. What code looks like: From back-end to front-end
4. Breaking up a Website Design: Anatomy of the page
5. Intro to HTML/CSS: And just a look at functions
6. Setting up directory structure & first index.html file

Day 2 & 3 - Coding:

1. Continuing to code: Online HTML/CSS references
2. Exploring and using HTML tags
3. Exploring using and nesting CSS selectors
4. Embedding images
5. Using images as backgrounds

Day 4 - Coding for Mobile Devices:

1. Media queries and coding for responsiveness
2. Coding Columns of content
3. Pseudo elements like :hover, :before, :after
4. :not(), :has() and other pseudo classes
5. Intro to Javascript functions and click events
